

## FIXED BOLLARDS

# G30

The G30 **fixed bollard** is the recommended solution to delimit and prohibit an access. It is recommended as a complement to retractable bollard access control to secure peripheral spaces while maintaining the same design. It enables to make pedestrian access safe by excluding vehicular traffic. It offers the impact resistance of a 2.5 ton pick-up truck traveling at 48 km/h\*.

### CHARACTERISTICS

Materials	Steel
Treatment	Hot-dip galvanizing (anti-corrosion)
Thickness	12.5 mm
Bollard diameter	250 mm
Bollard height	750 mm
Civil works depth	350 mm
Visual signaling	Retro-reflective band

\* Dynamic simulation performed by an approved laboratory

### ITS STRENGTHS

#### ACCESSORIES & OPTIONALS

RAL color of your choice	included
Customization of the sleeve	optional
LED light ring	optional

- Definitely delimits and prohibits an access
- Resistant to a 2.5 T pick-up truck traveling at 48km/h\*
- Compliant with the French PMR decree

Impact resistance of a **2.5T** pick-up truck traveling at **48 km/h\*** > **238 kJ**
